Loyola Breast Care

## CONVENIENT SCREENINGS

*A screening center is near you.* With nine locations in greater Chicago, Loyola makes it easy

to schedule an annual screening mammogram in your neighborhood.

*Early detection is your best option.* Loyola Breast Care recommends screening mammograms beginning at age 40 or earlier if you are at high risk for breast cancer.

*You have access to experienced breast care specialists.* When it comes to your screening mammogram, you can relax knowing that highly experienced technicians will handle your screening. Our experienced breast care staff can answer your questions and allay any concerns.

*To schedule a screening.* Give us a call at (888) LUHS-888 to schedule a screening. We'll let you know what you need to bring and what to expect during the exam.

## EXPERT DIAGNOSIS

*What if my breast screen raises concern or if I feel something in my breast?* Our team of specialists within the Breast Diagnostic Center answers your questions and keeps your primary physician fully informed.

*Both your individualized evaluation and your final diagnosis are performed by breast care specialists.* Based on our years of experience seeing hundreds of women just like you, we provide accurate, expert diagnosis.

*We offer modern, comfortable surroundings.* Our breast care specialists offer you many services in a relaxing atmosphere. Using the latest in diagnostic equipment and procedures, you have access to breast imaging, mammography, ultrasound, biopsies, and education and referrals.

## ADVANCED CANCER TREATMENTS

*A multidisciplinary team handles your care.* If you have breast cancer, then turn to our nationally recognized staff of breast cancer specialists. Our comprehensive approach means you have access to an experienced team of surgical, medical and radiation oncologists, and radiologists, pathologists and nurses.

*One visit, one location.* All of the specialists appropriate to your care will see you the same day at the Breast Oncology Center. Your team will also meet for a patient care review session

where they reach a consensus opinion of the best treatment approach for you, and then convey this consensus back to you.

*Compassionate care at every step.* To support your physical, emotional and spiritual needs, our nursing staff will connect you with experienced social workers, pastoral care providers, psychologists, dietitians and genetic counselors.

## INNOVATIVE RESEARCH

*Breast care breakthroughs.* A critical component of our comprehensive approach is an active research program. Our researchers lead and author major national studies that directly influence the prevention of disease, course of treatment, survival and quality of life. As a result, our team often has extensive experience with innovative treatments that other hospitals are just beginning to offer.

*Clinical trial discoveries.* Having a breast cancer research program means we can provide patients with the option to participate in some of the world's most advanced clinical trials.

*Reduced treatment time.* Our research team is studying new breast cancer procedures that promise to dramatically reduce the amount of treatment necessary—increasing the comfort and convenience for our patients.

Thanks to the exceptional work of this nationally recognized team, we continue to lead the way in care of patients with breast cancer.
