Did you know that the most common type of cancer is skin cancer (including melanoma and non-melanoma types)? When you have concerns about melanoma, turn to the Center for Skin Cancer located at the Cardinal Bernardin Cancer Center. Using the latest diagnostic procedures and the most advanced treatment options, our comprehensive medical team will evaluate your condition, and provide a unified diagnosis and treatment recommendation you can trust.

CARDINAL BERNARDIN  
CANCER CENTER

Center for Skin Cancer

*We also treat the human spirit.*

## CENTER FOR SKIN CANCER

The Center for Skin Cancer is dedicated to the diagnosis, consultation and treatment of various forms of skin cancer with special emphasis on melanoma. Our uniquely structured team-oriented approach allows us to meet each patient's individual needs compassionately, simply and without delay.

## CONVENIENCE

For your convenience, the Center for Skin Cancer provides you access to a diverse range

of medical specialists all under one roof. After you've seen the doctor,

your medical team will meet for a patient care review session to discuss its findings and to collaborate on diagnosis and treatment recommendations. To ensure that you fully understand your condition and treatment options, your doctor will present your diagnosis, treatment and next steps to you during your visit.

## EXPERT DIAGNOSIS AND TREATMENT

We offer a full range of services, from basic screenings with our dermatologists to complex cases referred to us by other physicians. Using our mole-mapping machine, the latest technology to track mole structure and size, we can retain images of patient moles to observe even the slightest changes that may occur over time.

## SUPPORT TEAM

If you have questions about your insurance, or just need someone to talk to, we can help. The Cardinal Bernardin Cancer Center provides you and your family members access to financial consultants for billing and insurance questions, experienced pastoral care providers, psychologists and social workers.

## COMMITTED TO EXCELLENCE

Loyola's Cardinal Bernardin Cancer Center is nationally recognized for the quality of its patient care, education and research. Using this research and the latest treatment options, our board-certified medical and surgical oncologists, dermatologists, registered nurses, radiologists, dermatopathologists and reconstructive surgeons work synergistically

to meet your medical and emotional needs. We complement our medical expertise

with compassion and remain focused on our mission to treat not just the illness, "we also treat the human spirit."
